

Suction pipe 38 with ball valve, 0126075

- For picking up powders and granules from barrels, hoppers and bags.
- The amount of carrying air can be adjusted via the ball valve, to allow for optimum air to product ratio.
- The inlet of the suction pipe is equipped with an arched steel wire to prevent bags from being drawn in to the pipe.
- The suction pipe diameter range matches the conveyor inlet and piping size range.

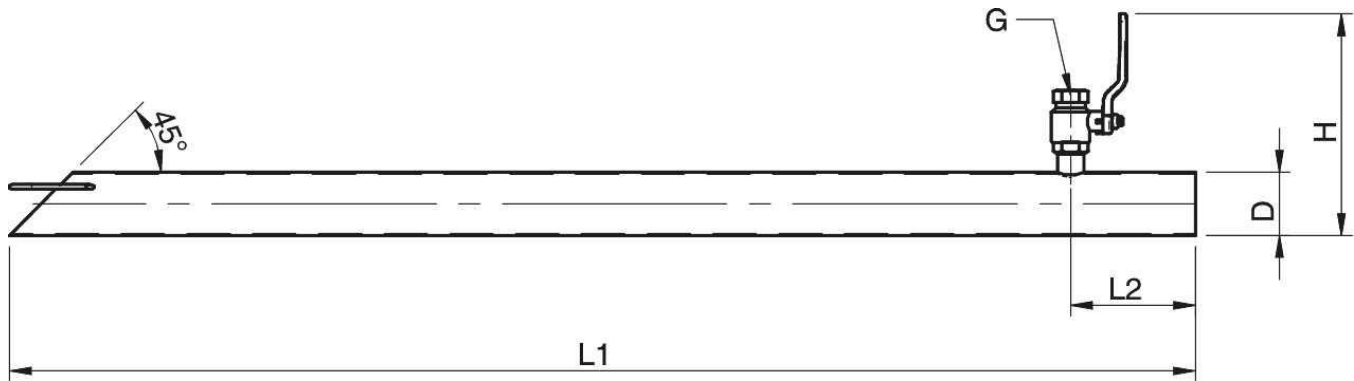

Общее

Отделка поверхности	Pickled, general product contact surfaces: Ra≤0,8
Материал	CuNi, ASTM 304
Weight	1,63 kg

Измерение

Диаметр	38,1x1,65 mm (D)
Высота	167 mm (H)
Длина	950 mm (L1)
Длина 2	100 mm (L2)
Резьба	1/2 in (1/2)
